Dear Sirs:

It is my understanding that Soil Safe is submitting an application to construct a Class B soil recycling facility in Carteret in order to remediate and stabilize sludge impoundments along the Rahway River.

Soil Safe commenced the operation of a similar facility in our township in 2003 in order to cap contaminated dredge material that exhibited very poor geotechnical properties. The objective was to remediate the site in a manner that was environmentally responsible and consistent with commercial redevelopment upon successful completion.

During the course of our nine year relationship, Soil Safe has distinguished itself as a valued corporate partner within our municipality. They routinely participate and support community activities; they have offered their personnel, equipment and supplies as needed to support our local construction and emergency management efforts; and they have performed their activities professionally in accordance with their permits.

Should you wish to discuss our experiences with Soil Safe in greater detail, please feel free to contact me at (856) 467-3424.

Frank W. Minor
Mayor
Township of Logan
